Mainstream critics discover Hiphop

and the good news is
they're still full of shit.

My own take: kids in wide, loose clothes,
jumping and chanting. At any rate, I can't
understand a fuckin word. In my previous witness

to the verbal arts, I picked up about 25%. Approx-
imately the rate for boring conversations everywhere.

By the way, Hiphop is "culturally important."
What isn't? Find anything, you got a start.
